OBJECTIVE: A summer petroleum engineering internship or a full-time job with an oil and gas company that will allow me the opportunity to gain valuable experience.

EDUCATION:	University of Tulsa	2003 - Present
	Major:	Petroleum Engineering
	GPA overall:	2.868
	Graduation Date:	May 2008

MAJOR COURSES:	Computer Application to P.E.	Petroleum Geology
	Drilling Engineering	Formation Evaluation
	Production Engineering	Reservoir Engineering

Experience:

June 2nd 2004-July31st 2004

- Summer Internship with Vanderbilt University and Fisk University Nashville, TN physics program. Helped in the construction of Nano-Photovoltaic solar panels. This was under the supervision of the National Renewable Energy Laboratory (N.R.E.L) in Cocoa, Fl. Worked under the physics program with Professor Dr. Richard Mu.

June 2nd 2005 – August 29th 2005

- Summer internship with Vanderbilt University and Fisk University Nashville, TN physics program. Continued with the construction of Nano-Photovoltaic solar panels and worked with the construction of glass for X-ray machines with Dr. Zhenga Pan and partner miss Marcia Hays.

May 8th 2006 – Present

- Worked with Graduate Students at the University of Tulsa Paraffin Deposit project and University of Tulsa Fluid Flow Project at North Campus

Activities:

- Member of Society of Petroleum Engineers (S.P.E)
- National Society of Black Engineers (N.S.B.E)
- Multicultural Chair and Secretary of Residence Hall Association (R.H.A)
- Resident Assistant at the University of Tulsa
